To Whom It May Concern:

I would strongly recommend Heather Asa for jobs that require quick thinking, organizational skills, and a pleasant demeanor with clients, tenants, and contractors. I had the pleasure of working with her when she served as the Project Manager for our Westside Business Center warehouse tenant improvements.

She managed all aspects of this project from beginning to end. Her communication and vision show in her completed projects.

While efficient in her professional role, she was genuinely interested in the well-being of her coworkers and clients throughout construction. This kind of professionalism and genuine care are traits that bode well for any General Contractor.

Project managers using ASA Construction will find their capital invested wisely and economically.

Feel free to contact me any time.

Sincerely,

Sean Rogers
