Re: Heather Asa

I am pleased to write a letter of recommendation for Asa Construction. I highly recommend Heather Asa as a very qualified Senior Project Manager/Owner. I have known Heather for the past 4 years. She worked for the Center of Embryonic Cell and Gene Therapy from 2014-2016 as an Administrator/Project Manager.

I have had the opportunity to observe her ability to navigate between science and construction. Her ability to design/build labs has proven that through hard work, follow through, and team work, Heather can accomplish tasks in a courteous and timely manner.

Here at the Center Heather was given the task to design/build our (3) research labs. This was a daunting task as the time frame and financial capacity was challenging. Even with such challenges I am pleased to say Heather did an outstanding job. Heather is well equipped to handle any challenge with which she is presented. Her ability to work under pressure, construction knowledge, and task orientation have prepared her for future complex projects. I strongly endorse Heather Asa with any healthcare projects you may have.

Sincerely,

Sincerely yours,

Shoukhrat Mitalipov, PhD

Director, Center for Embryonic Cell and Gene Therapy
Professor, Oregon National Primate Research Center
Oregon Health & Science University
